TeleCLOUD Off Line Installer

1. Introduction

The TeleCLOUD-OffLine Installer is a self-extracting winRAR. (TeleCLOUD.exe)

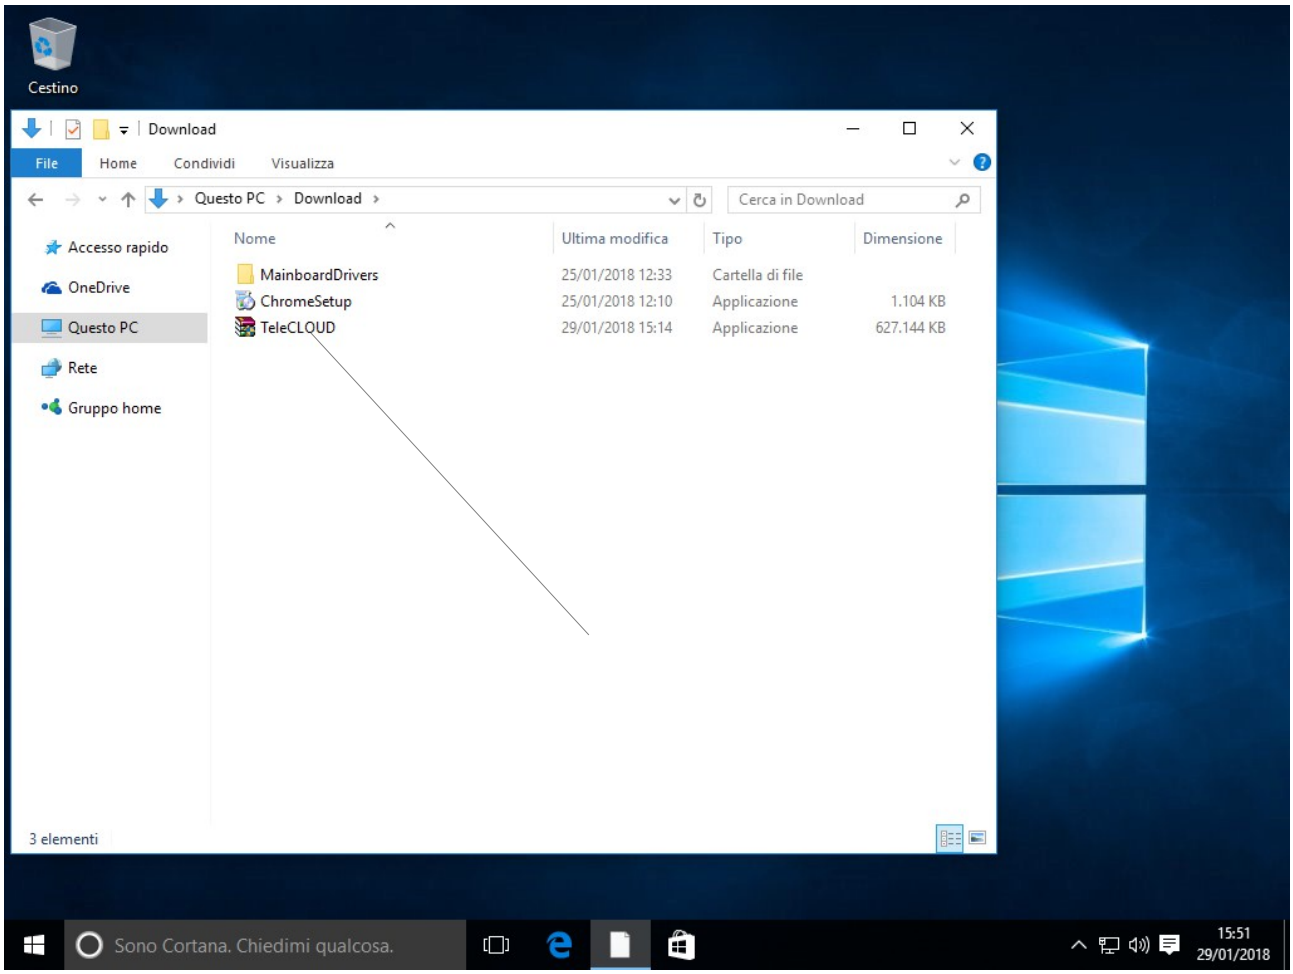
2. Installation requirements

The installation requires a Windows 7 or later (Win 10) 64-bit operating system equipped with at least 4 GB RAM and 2 GB of free disk. Provide also an adequate free capacity for the database (10 GB)

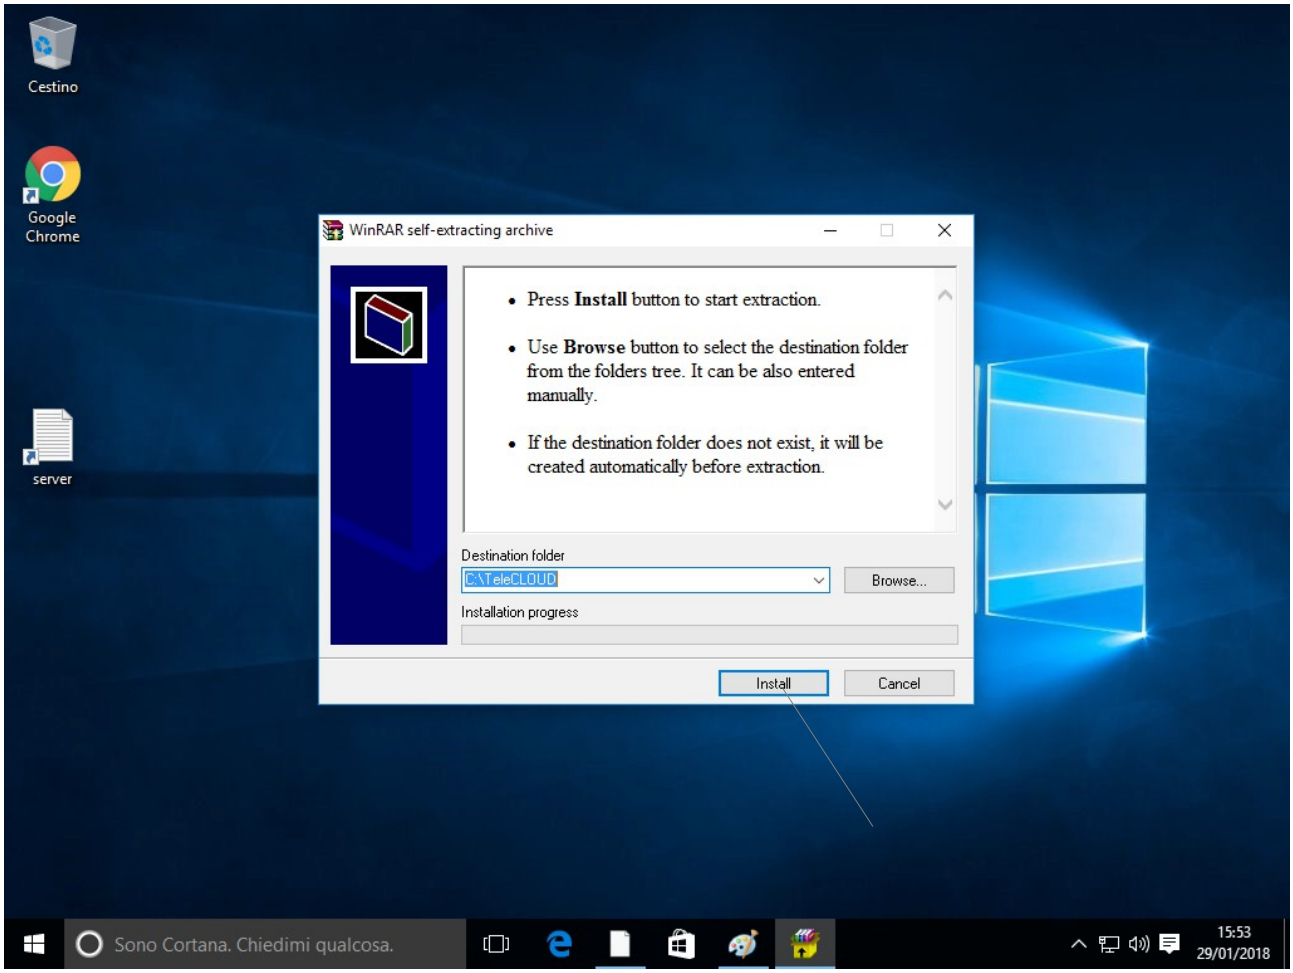
The installation requires that the Google Chrome browser is installed

3. Installation

Locate the TeleCLOUD.exe installer and place it anywhere on your computer, then execute it (double click) (Fig. 1)



The pre-installation screen will appear (fig. 2)



Accept all the default settings and continue by selecting "Install".

All data and installation programs are transferred to the C:\TeleCLOUD folder.

The installation supervisor is then launched.

Confirm by selecting INSTALL (Fig. 3)
